

Upgrade to Transitions® Junior lenses at no extra charge!

For a limited time, when you order our Junior Package lenses, you will be able to upgrade to the Transitions® Junior lenses at no extra charge.

Junior packages are designed **just for kids.**

Kids are hard on their glasses.

Junior package lenses are scratch resistant, stay smudge-free longer and reduce glare so they can take the treatment your kids dish out and stay clear to help them learn.

healthy sight in every light™

Children receive up to 80% of their lifetime UV exposure by the age of 20. Junior Transitions® lenses block 100% UVA/UVB rays.

- Junior Transitions® lenses are clear like regular lenses indoors and at night
- They quickly adjust to light conditions to give the appropriate level of darkness so kids stay comfortable indoors and out

engineered to protect their eyes

Our junior package lenses safeguard children's eyes.

Our junior package lenses are made of safe, shatterproof Airwear polycarbonate lenses. Plus they reduce glare from classroom lighting, whiteboards, and computers so your child's eyes do not become tired and red and your child can stay focused on learning.

give them lenses they want to wear

Junior lenses are made of Airwear polycarbonate material, which means they are 45% lighter and 25% thinner than standard plastic lenses so your child feels comfortable and looks cool.

Plus, the lenses are non-glare so people see your child's bright eyes and not the glare on the lenses.

choose our Junior Transitions® lenses and avoid compromise

Now you can affordably provide your child lenses and get our best-in-class quality standards backed by a full TWO year warranty!
